

Government of the Republic of Slovenia  
State Secretary Jure Leben  
Langusova ulica 4, 1535 Ljubljana

Graz, August 27, 2017

Dear State Secretary Leben,

Magna welcomes the announcement of the construction of an railway track to the Hoče plant which Magna contemplates to establish. In our current business plans, transport will be done by trucks, but we are aware that transport by rail potentially is an environmentally more friendly form of transport. Magna assures that industrial railways within the Hoče plant will be build in first phase in order to have an positive impact to the air quality on the longtime. If a track is built up to the plant and Magna expands its plant from a paint shop to a fully developed automobile plant (phases 2 and 3), we intend to carry out train transportation as well to optimize our operations to the greatest extent possible. Of course, any use of train transport will depend on the needs of our customers, the product types and its competitiveness.

Yours sincerely,

A handwritten signature in black ink that reads 'David Adam'.
